Product overview

Product Information

The 4.0 series metal button switch products are a group of combined switch systems. Includes: compact type-which the switching element and the actuator are assembled together; and modular type-which the switching elements and the actuator are divided into two independent modules. Used as a pushbutton, illuminated pushbutton, indicator function, and provides some special operators such as mushroom head button and accessories. The 4.0 series metal button switch is installed through the circular hole with a diameter of $\Phi 16$ mm; or with the proper front ring, it also can be mounted on a circular hole with a diameter of $\Phi 8$ mm, $\Phi 12$ mm, $\Phi 19$ mm and $\Phi 22$ mm. Switch element and LED lamp connection: Quick connection / soldering connection.

Product structure

Series 4.0 has two kinds of product structure

Compact type: the actuator, switching element and LED assembled together. One product has one switching element with 1 NC and 1 NO contacts.

Modular type: the switch elements and the actuator are divided into two independent modules.

One product have three switching elements with 3 NC and 3 NO contacts

Compact (1NO/1NC)

Modular(3NO/3NC)

Product overview

Illumination color and voltage (The brightness and color will be slightly different due to different batches of LEDs)

Using the built-in LED provides lighting.

LED color	LED voltage	LED Polarity
Red	6V AC/DC	LED terminal:
Yellow	24V AC/DC	"+pole" gold color
Green	110V AC/DC	"-pole" silver color
White	230V AC	
Other and Bi-color can be customized	Other voltage can be customized	

Front ring / button material and color

Material: SUS304 - matte surface treatment; color: natural, gold, black

Natural

Material

Switching housing: polycarbonate (PC)

Switching element: nylon (PA66)

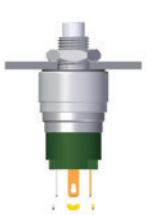

Terminals: Superhard copper alloy

Contact material: silver alloy

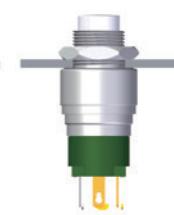

Mounting

The 4.0 series metal button switch is installed through the circular hole with a diameter of $\Phi 16$ mm. or with the proper front ring, it also can be mounted on a circular hole with a diameter of $\Phi 8$ mm, $\Phi 12$ mm, $\Phi 19$ mm and $\Phi 22$ mm. There is an anti rotation groove for $\Phi 16$ mm, $\Phi 19$ mm and $\Phi 22$ mm products to prevent product rotation, it is mainly applied to products with lighting symbols and laser engraving

Description of electrical wiring numbers (terminal numbers) of modular product

The first number of terminal number indicates the number of switches, 1 means first switch, 2 means second switch, 3 means third switch.

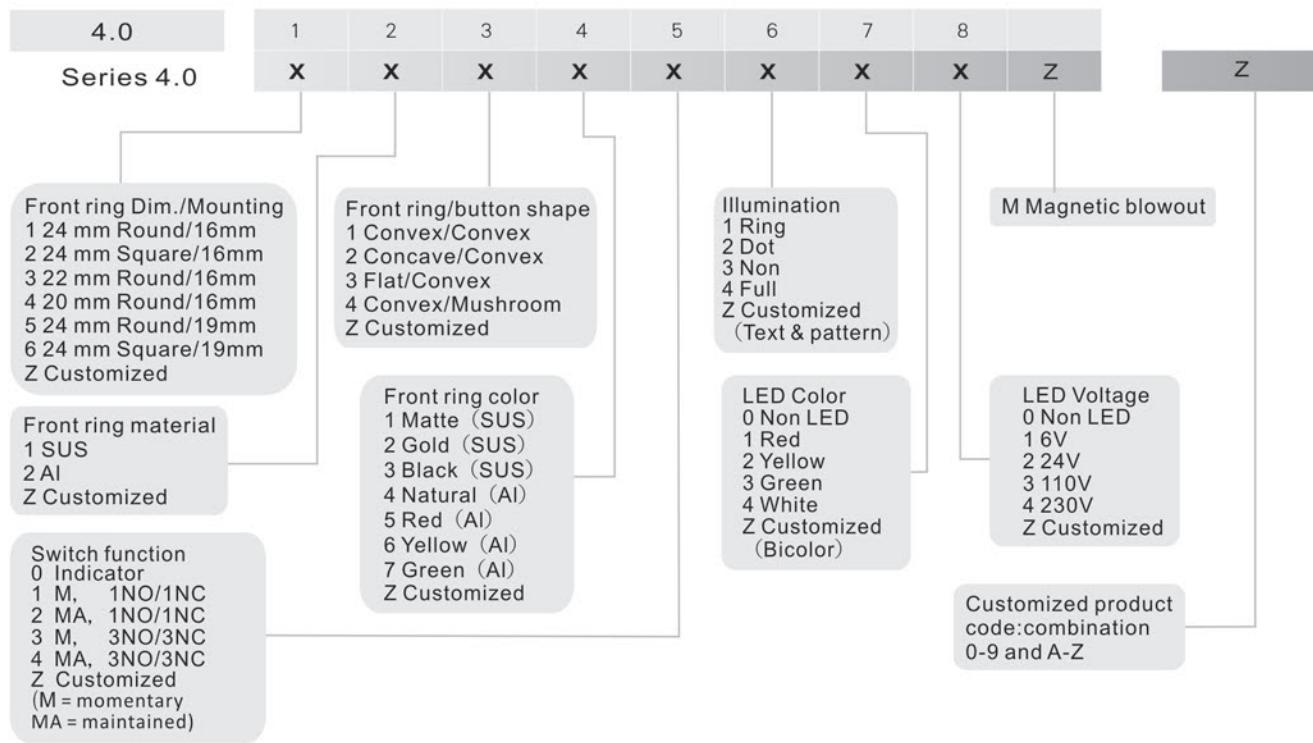

The second number of terminal number indicates the state when the switch is not actuated, 1 means NO; 2 means NC, C means common

Operating function:
momentary and maintained

Product coding and selection instructions

4.0Series metal pushbutton coding principle (for specific product selection please refer to page9-31)

Product Selection Explanation

This numbering system table stands for standard $\Phi 16\text{mm}$ mounting hole version. Other mounting hole dimension needs specific modification on the numbering as below:

Digit 1: mounting hole $\Phi 8\text{mm}$ (front ring dimension $\Phi 12\text{mm}$), digit 1 should be changed to A
mounting hole $\Phi 12\text{mm}$ (front ring dimension $\Phi 16\text{mm}$), digit 1 should be changed to B
mounting hole $\Phi 19\text{mm}$ (front ring dimension $\Phi 24\text{mm}$ or $\square 24\text{mm}$), digit 1 should be changed to 5 or 6
mounting hole $\Phi 22\text{mm}$ (front ring dimension $\Phi 28\text{mm}$), digit 1 should be changed to D
other size are on request. Z stands for customized customer request.

Digit 2: universal. All version could select. Front ring and button keeps same metal material.

Digit 3: mounting hole $\Phi 8\text{mm}$, $\Phi 12\text{mm}$, "Front ring / button shape" is only "flat \ flat"
mounting hole $\Phi 8\text{mm}$, digit 3 should be changed to A
mounting hole $\Phi 12\text{mm}$, digit 3 should be changed to B
Z stands for customized customer request (Change the shape of the front ring only)

Digit 4: universal. All version could select. Metal front ring and metal button keeps same color, It can be customized when different colors are needed, please specify

Digit 5: universal. All version could select
Z stands for customized customer request (for modular type, it might be possible to have different switching element)

Digit 6: the materials of ring and dot lighting part are plastic with white color.
the material of full button lighting part is plastic, and the color is same as the lighting LED color.
other colors are on request. Z stands for customized customer request.

Digit 7: universal. All version could select. Indicator could not select "0 Non LED"

Digit 8: universal. All version could select. Indicator could not select "0 Non LED"
Z stands for customized request (voltage < 230V, power<0.25W)

Digit Z: these digit stand for customized request

"M" stands for "Special Magnetic Arc Extinction" optional on compact type 1NO\1NC switching element.

4.0 Product installation instructions

Caution

Please turn off or disconnect the power supply before installation or maintenance in order to avoid electrocution risk.

Operation voltage higher >60V AC/DC, metal panel and metal pushbutton must be connected to ground.

Tightening torque: 50 N.cm min. – 200 N.cm max. for fixing nut

Wiring specification: 2.8 X 0.5 quick connection or soldering

The maximum wire cross-sectional area :1 X 1.5mm² or 2 X 0.75mm²

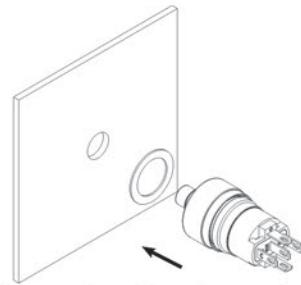

Soldering temperature: Electric soldering iron with temperature control is recommended. if not, the power of eletric soldering iron should be between 15-20w. In any case, the temperature of electric iron welding head shall not exceed 280°C, welding time is controlled within 3-5 seconds. Otherwise, continuous heating will damage the switching element.

Mounting instruction

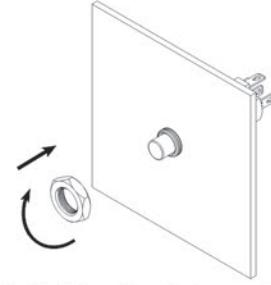

4.0 Series compact: 8 / 12 mm

1. Product composition

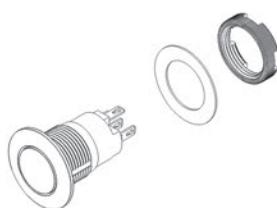

2. Button and sealing ring are installed from the back of the panel

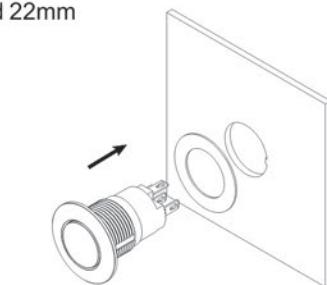

3. Tighten the fixing nut clockwise from the front of the panel

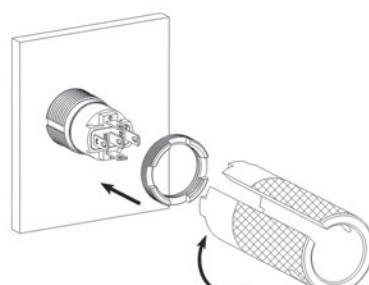

4.0 Series compact: 16mm, 19mm and 22mm

1. Product composition

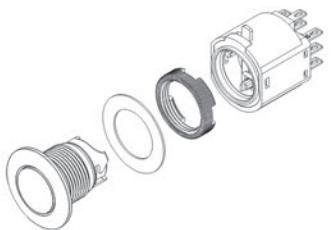

2. Button and sealing ring are installed from the front of the panel

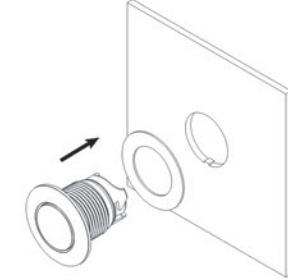

3. Tighten the fixing nut clockwise from the back of the panel

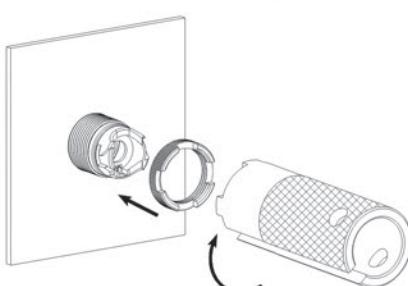

4.0 Series modular

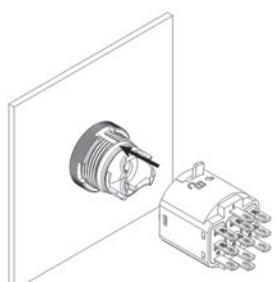

1. Product composition

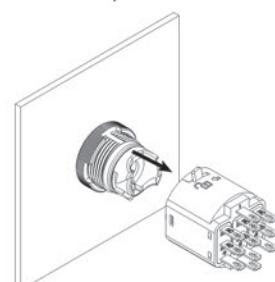

2. Actuator and sealing ring are installed from the front of the panel

3. Tighten the fixing nut clockwise from the back of the panel

4. Assembling switching element: the metal handle of switching element is aligned with the groove of the metal front ring, then push to lock the switch

5. Disassembling switching element: turn the metal handle of switching element to the unlock position, then pull out the switch

5.0 Series product introduction

5.0 Series: Double break switch

Appearance and configuration corresponding to series 4.0

Self-clean snap-action switching element

Recommended Max. 3 switching elements: 3NO/3NC

Conventional free air thermal current I_{th} : 8 A

Switch rating: alternating current (AC)

Rated operating voltage U_e / rated working current I_e under usage category

AC-12

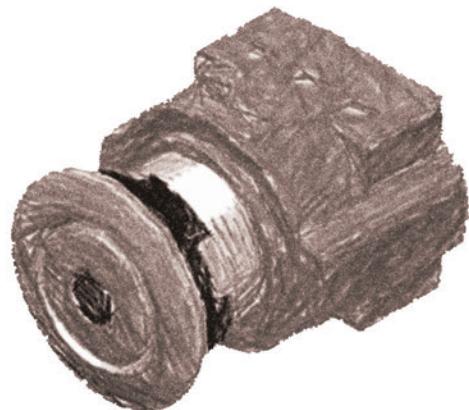

U_e	I_e
24 VAC	5.0 A
110 VAC	5.0 A
220 VAC	3.0 A

DC - 12

	I_e
24 VDC	5.0 A
72 VDC	2.0 A
110 VDC	1.0 A
220 VDC	0.3 A

Recommended minimum operational data:

voltage	current
5 V	10 mA
12 V	5 mA
24 V	2 mA
110 V	1 mA

6.0 Series product introduction

6.0 Series High-current switches

Ultra short installation depth

Self-clean snap-action / slow make switching element

Recommended Max. 3 level switching elements:

6NO; 6NC; 3NO/3NC

Conventional free air thermal current I_{th} :20 A

Switch rating: alternating current (AC)

Rated operating voltage U_e / rated working current I_e under usage category

AC-12

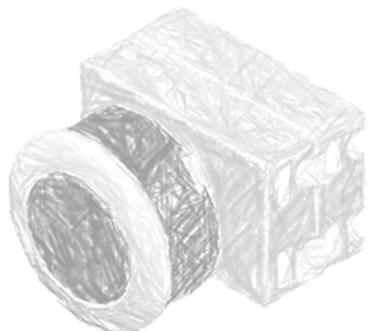

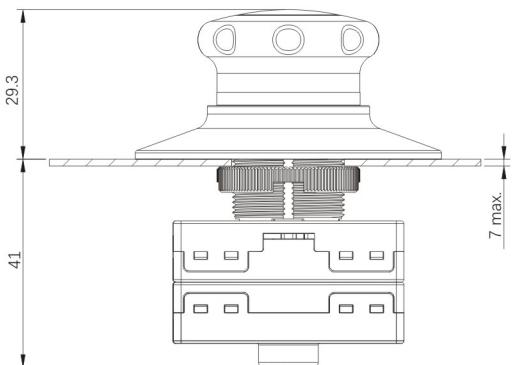

U_e	I_e
24 VAC	20.0 A
